THE WATSON SIO SEWING MACHINE. A BOUF the 20th day of August, 1816. I was employed by Messes Wats a, Wooster & Co., composed of Wm. C. Watson Morris Knight, and George it. Wooster, to manufacture Sowing Machines, which were known as the "Watson fon Dollar Fewing Sachines." That thereafter I received a notice from the counsel of O. B. Poter and N. Wheeler, mentioned in the annexed copy of injunction, informing me that these Machines were an infringement upon betters Patent which they owned, and that suits would be instituted against me, unless I should otherwise settle with them. This notice I h nded to Mr. Wooster, one of my employers.

out of my employers'

I then made investigations to assertain the facts, and found that said Machine, as f believed, was an infringement of said Patent, and I informed said Watson that such wa- my opinion.
Sub equently a suit was commenced against me by said
Patter and Wheeler, and imme fatery thereafter I so informed Mr. Watson, and requested him to take charge of
the defence of the same, and he refused to do so, and I

then told hin that I would have nothing more to do with it, and I then cessed to make the Machines; and the in-junct on, a copy of which is hereto ann-xet, was issued and erved upon me. JOEL CHASE. Dated New York, February 1th, 1857. In presence of Witte B. Aspars I to bereby certify that the above statement, subscribed by mr, is correct and true. JOEL CHARE.

PATENT ELASTIC FIRE & WATER-PROOF CEMENT ROOFING.

THE undersigned are prepared to introduce into use in Tennessee W. E. CHILDS & CO.'S PATENT ELAS-TIC FIRE AND WATER-PROOF CEMENT ROUFING, and ask the attention of Architects, Builders, Railroad Compan es, and the public to examine its superiority over other ARCHITECTS AND BUILDERS should not fail to examine this Roofing, at it is better and cheaper than any thing in use. The material forms a hard and smooth surface that will reast the action of the atmosphere in every imate. It is impervious to water, clastic, and flexible, toontracts and expands with the changes of the a mos-

there, and will neither -vaporate, crack nor rot; and, as to It is practically imperishable, and will perfectfully resist any ordinary external exposure to fire, as is abundantly proved, and we will warrant it water-proof. We will engage to put our Roofing on over ordinary good heathing old sningles, tar ind gravel, tin, sloc, couper or iron roo It making no difference how steep or flat they may be for seven dollars per one hundred square feet; it being far heaper than any Roul of the old style, and we are sure it

It will also be found to be the best thing ever invented to cove or mend old leaky tin, target gravel roofs, or around of the best makers, and in all widths, which we will cut in chimneys, souttles, dormar windows, and gutters, where the any shape to suit purchasers. tin is rusted through. This Cement can be put on to last as long as stone, and form a perfect addesion to any ob-ject to which it is applied. Tin Roofs can be na need over (and warranted no: to leak) at two d liars and fifty cents per hundred square feet, which is cheaper and much bet-ter than paint. This moofing will be found to be the best thong for covering large moofs where the are sposed to fir —such as Sceam Mills, Saw Mills, Factories, Railroad Cars, Bridges Depots Station Houses, Steamout Decks, and, in fact every kind of Roof where there is an external exposure from fire. As the Roof is perfect, without a joint not, if presen and chance for first to communicate, and any light substance will burn out without igniting.

The insurance Offices at Cincinnati, and other places where Child & Co.'s towen has been used, insure Buildings, with Moofice over and other this Cement as the same ngs with stoofs powered fith this Cement, at the same rates as for those covered with Iron, Copper or Tin
The Cement will be furnished to those at a distance with directions for using.

*** Grant to the undersigned, through the Post-

office, will be promptly attended to

THE GREATEST INVENTION OF THE AGE. West's Patent Galvanic Cement For Roofing.

THF subscriber is now repared to cover roofs of buildings, with a new and better article that ever before known. The public are aware that our Government has had recentific men experimenting, and that it has been the study of Archivects and Builders for years, to discover an article for roofing purposes, that would stand the sudden changes of the seather, and he innervious to fre and water, and remain a persuanent fixture. As yet, nothing has been attained without cotting more than the people with. The contraction, expanyion and rusting of metal with. The contraction, expansion and rusting of metal roofs, are so great in changeable climates, that they become usele s, unless being repaired at great expense yearly. Thirgies are not fire proof, and cannot be used on flat rofs, and the various Compositions and Cements that have been brought into use for rooting, do not stand the action of the weather, but they run when it is warm, and crack when frosty, and after one or two years become crumby, and worthless; whereas, the inventor of the Galvanic Cament, has labored twenty years to combine articles to obviate those difficul by, and can testify from his lorg experience, and numerous tertimonials from reliable persons, who have had his combination applied to their buildings, that his Company is the cheapest and hear stellar persons, who have had his combination applied to their buildings that his Cement is the cheapest and best aticler ever before known. The combination of this Cement is such that it is calculated for entire new roofs, flat or steep, covering over old shingles without removing them; lining cave-toughs, seaming around battlements, chimneys and sky-lights. Covering car-tough, steamer-decks, ac. This Cement, by its non-conduction and galvanism, prevents metal roofs from rusting and unsoldering, and resists the extremes of heat and could, better than any thing ever invented, for entire roofs or for covering metal and the outside of wood by idings, making them fire proof. Its appearance is like slate; beautiful for the rich palace or the humble covings.

humble cottage.

The undersigned having secured the right to the State of Ferniage, will sen rights of Ferniage, by Counties or Towns, on reasonable terms.

The subscriber is also prepared to cover roofs of buildings, in any part of the State, at hort notice.

This Roof is now being put on in this city, for the benefit of all concerned, and warranted to excel all other modes of Roofing. The sub-criber has ad his mode of Boofing tested as to its qualities, during the last year and a haif in the city of Memphis, which has proved satis actory to which a number of the nost prominent citizens can

This is a purely vegetable compound, prepared on strictly scientific principles, after the manner of the celebrated Holland Prefessor, Boerhave. Because of its great success in most of the European States, its introduction into the In most of the suropean States, its introduction into the United States was intended more especially for those of our fatherland scattered here and there over the face of this mighty country. Meeting with great success among them, I now offer it to the American public, knowing that its truly wonderful medicinal virtues must be acknowledged. It is particularly recommended to those persons whose constitutions may have been impaired by the continuous use of ardent aptr is, or either forms of disripation. Generally instantaneous in effect, it finds its war directly discrete.
